EXPERIENCE

Trainee QA Executive

Winman Software India LLP | October 2025 – January 2026

- Responsible for and managed testing of new features and updated features of internal application like Ticket, Reminder, DataManager, etc.
- Actively identified, documented, and tracked software defects, collaborating with the development team to ensure high-quality feature releases.

Intern – IT Software (Product Management)

K12 Techno Services Private Limited | January 2026 – Present

- Working as a Product Management Intern, supporting product lifecycle activities including requirement analysis, documentation, and coordination between technical and business teams.
- Assisting in data analysis, issue tracking, and process improvements for ERP-based systems.
- Collaborating with cross-functional teams to understand user requirements and translate them into functional specifications.

PROJECTS

CSS Playground - Interactive Learning and Code Generator

Project Lead | Backend Developer

Technologies: HTML, CSS, JavaScript, JQuery, BootStrap

- Developed an **academic project**, an interactive platform for real-time CSS experimentation and code generation, featuring styling modules and dynamic code previews (**initial version lacked responsiveness and user appeal**).
- Updated version:** Improved UI/UX, enhanced responsiveness, and refined design to create a more visually appealing and user-friendly experience.

React Portfolio – Personal Developer Showcase

Developer

Technologies: React.js, JavaScript (ES6+), CSS3, HTML5, EmailJS, React Icons

- Designed and developed a **fully responsive portfolio website** to showcase projects, skills, and certifications.
- Integrated React.js for component-based development, EmailJS API for seamless contact form functionality, and React Icons for consistent and scalable iconography.

CERTIFICATIONS & COURSES

- Google Cybersecurity Professional Certification**
Google + Coursera
- The Complete Full-Stack Web Development Bootcamp**
Udemy
